AXOOM Company Profile

**AXOOM**

# AXOOM

AXOOM GmbH, headquartered in the technology region of Karlsruhe, was founded in 2015 as a subsidiary of the TRUMPF Group. The company employs around 100 people who see themselves as passionate shapers of the Industrial Internet of Things. With the AXOOM platform, they are developing an open operating system for the industry, which pools data from machines and provides apps for the optimal operation of these machines and the entire value chain.

For the benefit of the AXOOM ecosystem: Thanks to AXOOM technology, machine builders can offer smart machines and develop digital business models. Manufacturing companies are experiencing new dimensions of transparency and productivity. App and distribution partners benefit from the marketplace potential of the platform. The experts at AXOOM with their software and mechanical engineering know-how support this ecosystem: They quickly link every machine to the platform, develop individual strategies for digital transformation and thus make AXOOM the initiator and partner of integrated Industry 4.0 solutions.

## **AXOOM is ...**

- ... a strategic spin-off of TRUMPF GmbH + Co. KG
- ... a medium-sized software company with a focus on mechanical engineering
- ... a platform provider focusing on Industry 4.0 solutions and value adding networking.

## **AXOOM is unique for its ...**

- ... fast, secure machine connectivity,
- ... innovative strategy and process consulting,
- ... roots in mechanical engineering.

AXOOM is developing an IoT platform that ...

- ... hosts and pools machine data,
- ... offers a cloud infrastructure for digital services,
- ... provides apps for optimizing manufacturing,
- ... serves as an offer base for smart factory solutions and new business models,
- ... makes its customers stronger through network effects.

AXOOM's products and services are aimed especially at machine builders. For them, AXOOM offers added value in many areas:

- > a competitive advantage thanks to machines with a **secure connection to the cloud**
- > new web-based **service business models**
- > better products and processes thanks to **insight into field data**
- > **satisfied customers**, who profit from AXOOM:
  - > **transparency** across the shop floor and machines
  - > higher utilization, **lower production costs**
  - > **less downtime** thanks to preventive maintenance
  - > improvements to the **quality** and supplier reliability
